

Electric Shift Directional MDE

DINOIL

A reminder about the popular MDE electric shift directional valve.

Features include;

- * This valve is a 3 position on/off style mono block.
- * It comes in 1, 2, 3, 4, 5 and 6 bank castings, each with relief valve on the pressure line.
- * We stock all the above in parallel circuit.
- * Spool options are; double acting, single acting, motor and some specials.
- * Manual Spool shift override.

Specifications;

- * Rated as a 35 LPM flow, 150 bar max operating pressure. Ported 3/8 BSPP.
- * Relief range is 90-190bar.
- * High pressure carryover is available on all but the single bank.
- * Coils are robust steel exterior & connect with standard Hirschmann din plug.
- * Voltages are 12 and 24 VDC.

We have sold big volumes of this valve so we know it is a reliable performer. Remember it when you want a simple on off valve, it works out cheaper than Cetop Valving.
