

Power Units

Powerpacks

The new Oil Systems line of modular pump packages have a multitude of variations in all of the following aspects;

Displacements, Valving, Tanks and Motors.

This means:

- * Virtually any circuit can be built up on the manifold.
- * Any power source can be used. Standard frame size 1 & 3 phase electric motors can be connected through the bell housing and coupling options.
- * They can stand vertical or lay horizontal.
- * Up to 60 litre tank volume.

The models we are currently stocking are suited to applications such as ute / light truck hoists, chair lifts, tailgates, presses and this lower duty cycle type work.

Package includes valving, tank, pump, motor & relay.

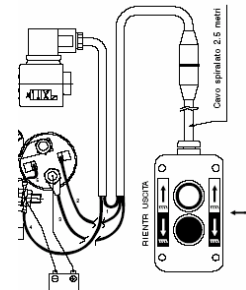

12 & 24 Volt DC single phase AC , 3 phase AC Motors.

Please remember, we are able to price any configuration for you, so don't hold back from asking.

Pendant switches available also as indicated in the sketch.

Picture illustrates some options & the versatility of the range. Product stocked is as shown
