

"NEW LINE"

Pressure Transmitters & Sensors

For data logging
& live reading.

Compatible with most Diagnostic
tools, PLC's and Computers.

Built for Hydraulics,
Pneumatics, Refrigeration and
other gases / fluids.

Designed specifically for long term

Features

- Stainless one piece machined body
- no welds, no internal orings, no silicon fluid
- Wide operating temperature range
- Pressure ranges up to 10,000 PSI
- Low static and thermal error
- Unparalleled performance ratio
- Suitable for high shock and vibration applications.

Specs

- 1/4 BSPT male thread
- 4-20mA output
- 43560 DIN Plug connection
- Stainless body and cover

High quality product brought to you at a great price!
